

At Liberty, we support customers to grow successful businesses with a range of lending solutions from our free-thinking toolbox.

Here's how we were able to help a customer improve cash-flow.

Customer story: A hardware and building supplies company with a turnover of \$5.7m

per annum was seeking funds to refinance a vendor loan.

Liberty solution: The customer was able to access equity in their commercial premise

to extend the loan term and reduce their overall rate. Liberty offered a 105% LVR under the Liberty Mint product, supported by an All PaaP over

a strong and consistent trading business.

For more information about our Business Capital solutions, download the Australian Business Introducer Guide from the Commercial documents tab on Liberty IQ.
